CD10P CARPET DRYER

1 Hp Electric Air Ventilation Blower

CARPETS • HARDWOOD FLOORS • FLOODED AREAS • GENERAL CIRCULATION

The **CD10P Carpet Dryer** is a powerful and efficient way to move air to accelerate evaporation rates for drying carpets, hardwood floors, flooded areas, and general air circulation requirements. For minor flooding events in the home or office, quick drying with a dryer is the best defense against the formation of mold and mildew. Can be aimed horizontally, vertically, or at a 45 degree angle to maximize convection patterns. A three speed electric motor varies air flow rates to meet almost every job requirement. The low 72dB noise level makes it the ideal solution for drying entryway mats in wet weather, hallway corridors during normal maintenance or any area that is noise sensitive. Carry handle is balanced for easy transport. This blower is powerful, durable, and lightweight.

- **Three-speed motor w/ 3800 cfm maximum air flow rate**
- **Stackable for operation and storage**
- **Non-corrosive inlet screens**
- **Damage protected ON/OFF switch**

Operating Environments	Non-hazardous type locations
Electric Motor	1 Hp, 115 VAC, 60 Hz, 3-speed
Housing Construction	High density, UV resistant polyethylene
Fan Construction	Galvanized steel
Operating Positions	Horizontal, 45°, Vertical
Max. Air Flow Rate	3,800 cfm
Extension Cord	14-3 SJT x 25 foot (8 m) length
Dimensions	19.75" L x 18" W x 21" H
Weight	42 lbs (19 kg)
