M102 BITTYBREAKER

Hand-Operated Impact Breaker

- CUT ASPHALT
- BREAK CONCRETE
- TAMP DIRT
- BREAK FROST
- CHOP ROOTS

Here's a solution to bulky compressors, leaking hoses, hot hydraulic oil, and every other problem that makes running a jackhammer on small jobs so expensive. It's the M102 BITTYBREAKER®.

It might just be the most useful hand operated construction tool that you will ever use. Produces an incredible 1450 ft lbs of destructive energy per blow. Accepts a wide range of industry standard 1-1/8" hex x 6" shank jackhammer tools for any number of job applications. A BITTYBREAKER® quickly makes a sledgehammer or pick axe a thing of the past because it concentrates the blow force on the same spot until the job gets completed.

If you're looking for an inexpensive and productive solution to some real expensive problems, put a BITTYBREAKER® to work.

Hex Shank: 1-1/8" (35 mm)
Length: 43" (1092 mm), less jackhammer tool
Weight: 22 lbs (10 kg), less jackhammer tool

Frequency: 10-20 blows / minute
Impact Energy: 1,450 ft lbs
Tool Retainer: Accepts jackhammer tools with standard upset collar
